

## VEHICLE PHYSICS PRO IS NOW INTEGRATED WITH D-BOX MOTION SYSTEM

---

**Vehicle Physics Pro** is proud to announce that its software is now compatible with the D-BOX Motion Cueing System. Widely used in simulation for training new drivers, testing equipment and vehicles, D-BOX has become a smart reference for the automotive industry. .

The D-BOX Motion System reads from Vehicle Physics Pro existent telemetry to provide all the needed kinesthetic cues to the driver. With its small footprint and it's low cost, D-BOX is an optimal solution to improve your simulation.

For more information on Vehicle Physics Pro, please contact Angel Garcia ([edy@vehiclephysics.com](mailto:edy@vehiclephysics.com))
